EDUCATION

Vellore Institute of Technology, Chennai

2023 – 2027

B.Tech in Electronics Engineering

Indian Institute of Technology, Madras

2023 – Present

Bachelor of Science in Data Science

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems

ACHIEVEMENTS & CERTIFICATIONS

India AI Impact Buildathon - National Finalist: Recognized among the top 2% out of 40,000+ participants at the HCL GUVI India AI Impact Buildathon.

Winner – DeFy’25 Hackathon: 1st place among 350+ participants for building Digisoul, a Web3 reputation system using ZKPs and Soulbound Tokens.

Smart India Hackathon 2024: Selected for National Round for developing SaveMyNode, a Linux file recovery tool for XFS/BTRFS.

Visteon SCHOLAR 2025: Selected for the prestigious cohort among 13,000+ applicants nationwide after a rigorous multi-stage technical screening.

Deep Learning Specialization – Stanford University (Coursera)

EXPERIENCE

OrangePeople

Jun 2025 – Aug 2025

Software Engineering Intern

- Developed and evaluated an NLP-based ML model converting natural-language queries into structured architecture diagrams, achieving >85% accuracy.
- Worked on data preprocessing, feature extraction, model evaluation, and error analysis in Python.
- Integrated ML models into production FastAPI services and deployed systems on AWS.

Open Source Contributions

2023 – Present

Zen Browser, IEEE Computer Society VITC

- Contributed features, bug fixes, and tests to Zen Browser, adopted by thousands of users.
- Built event-registration CLI and note-sharing tools at IEEE VITC, improving workflows for 500+ students.

CyberSecurity Student Community (CYSCOM), VITC

May 2025 – Present

Vice Chairperson

- Managed a 200+ member technical community; organized workshops and CTFs and mentored juniors in cybersecurity fundamentals.

PROJECTS

SaveMyNode | *Inode Recovery Tool for UNIX Systems* | 🌐

- Created a recovery tool for BTRFS and XFS file systems restoring corrupted or deleted inodes with 92% accuracy.
- Parsed superblocks and inode tables for low-level data reconstruction and automated corruption simulations for benchmarking.

Fluz Pay | *Transaction Management Service* | 🌐

- Designed a backend service in FastAPI with JWT authentication, transaction logging, and error handling.
- Containerized the application with Docker for consistent deployment across environments.

CV Powered Motion Controller | 🌐

- Built a computer-vision gesture recognition pipeline using OpenCV and MediaPipe, achieving 30 FPS real-time inference.
- Mapped gesture predictions to keyboard inputs for application and game control.

SKILLS

Programming: Python, Java, C, C++, JavaScript, TypeScript

Backend/Frameworks: FastAPI, Flask, Prisma, Express.js, REST APIs, Docker, PostgreSQL, MongoDB

Tools: Git/GitHub, Linux
